Forex and stocks

Forex is the most liquid and most traded market in the world, with over £5 trillion traded daily. The Forex market is decentralized, meaning there is no central location where trading is conducted; instead, Forex trading is conducted over the counter (OTC).

- The Forex market is open for trading 24 hours a day, 7 days a week and is traditionally divided into three sessions that overlap throughout the day:
- The Asian or Tokyo Session Key economic data about the region that can impact the entire trading day are released during this session.
More activity expected in currency pairs with the Japanese yen
- The European or London Session This session coincides with the end of the Asian session and sees the release of important data from Europe. Liquidity is highest during this session and increased activity is expected in pairs with the euro and the pound sterling
- The North American or New York Session Coinciding with the second part of the European session, trading volumes reach their maximum during this session. Significant price movements are expected in pairs with the US dollar.

Real estate

Acer Investments is building the leading marketplace for real estate investment. Our mission is to make owning investment real estate radically affordable and simple.

Our platform enables everyone from first-time investors to global asset managers to buy and own residential investment properties with the confidence of a the world. Since launch, we have surpassed \$4 billion in transactions and continue to revolutionize the industry with cutting-edge technology and innovation.

Agriculture

An agricultural investment is any investment in agricultural land or a business that supports the agribusiness industry. Agricultural land is also called farmland, arable land, farmland, or cultivated land. Agribusiness is any business that deals in agricultural products or services needed for agriculture. This can include businesses such as seed or fertilizer distributors, lumber companies, tractor companies, and processing or packaging facilities.

At Acer Investments, we are passionate about bridging the gap between investors and agriculture. Farmers will need to produce 70% more food by 2050. With demand for food skyrocketing and availability of farmland decreasing, we believe investing in farmland is a smart move.
